

NUR – New Urban Resources

Renewable Energies for Bethlehem

Partners presentation

Ai Engineering s.r.l.

Turin, 18th -19th April, 2018
Kick Off Meeting

With the support of

In collaboration with

Ai has been successfully operating since the '70s and employs about 90 people in Torino.

Ai takes a leading role in the various engineering sectors, developing a host of activities including investment plans and feasibility studies,

environmental impact appraisals, urban and regional plannings, design, site supervision, workers safety control and management, project management & control and construction management.

Ai is member of GBC Italy, which aims at the diffusion of a building sustainable culture promoting LEED® certification system.

Ai's Mission is to provide specialized engineering, consulting and design services to both public and private Clients, by exploiting the quality of its skills, work and know-how.

Commitment, stability and responsibility are essential in creating

and obtaining Client loyalty, thus ensuring an autonomous and impartial support.

Independence is a fundamental value for the firm, as it results from the freedom of action and choice in identifying the best possible solutions for each project.
