

Scuola Centro Civico is a centre open to the citizenship that offers formative, cultural and social experiences in order to foster innovation in education and teaching methods, while ensuring the quality of the educational spaces.

Within Scuola Secondaria di I Grado Drovetti, we can find different places where to meet and experiment the languages of art: over 1200 square meters, equipped for the community.

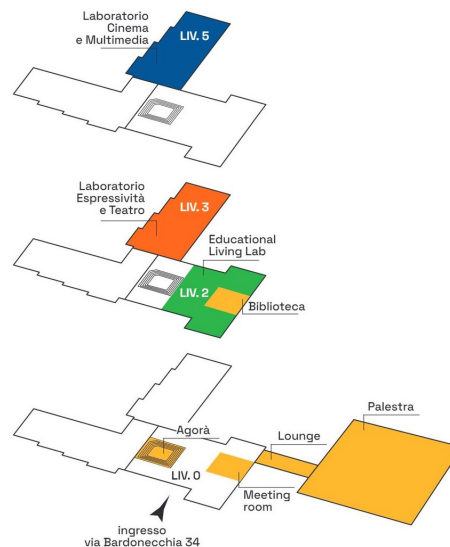

Scuola Centro Civico was born thanks to the collaboration between ITER and IC Maria Luisa Spaziani and was realized with the contribution of Fondazione Compagnia di San Paolo and Fondazione CRT.

Scuola Centro Civico can count on the collaboration of its numerous educational partners, such as Università di Torino, Politecnico di Torino e Milano, INDIRE Torino, Fondazione per la Scuola, Fondazione per l'Architettura Torino and Museo del Cinema.

The school is also one of the branches of Scuola Diffusa di Musica della Città di Torino.

ITER Istituzione Torinese per una Educazione Responsabile is an instrumental entity of the City of Turin and works within the Divisione Servizi Educativi.

EDU LAB EDUCATIONAL LIVING LAB

Edu Lab is a space thought to experiment environmental and technological field and to propose innovative content for teaching and learning, to make the participants feel like true protagonists.

Promoted by Città di Torino, within the **Learning Technologies Accelerator framework**, EDU LAB hosts many labs thanks to its high functioning data infrastructure and tools to implement teaching innovations.

Edu Lab is one of the challenges of **Torino City Lab** and it is addressed to any actors playing in the educational field: kindergartens, universities, research institutions, public and private entities, associations and companies that promote innovation in the field of education.

THEATRE LAB

A space focused on theatre and its various forms of expression: representations, show, narration, story invention, shadow plays, using natural materials to realize environments and scenographies

Thanks to the collaboration with **Fondazione Teatro Ragazzi e Giovani Onlus**, ITER promotes theatrical languages through labs, performances and formative experiences.

In labs we can find some **special spaces**: the **Theatre Room**, a space that can be darkened and that does not have any elements of scenography; and "**The House in the Wood**", a handmade wooden structure that becomes a magic and suggestive place, ready to host stories, smells, and sounds of nature.

CINEMA AND MEDIA LAB

A place devoted to the active and creative learning of the cinematographic and media languages. A place to experiment and discover different technical skills: from pre-cinema to moving images, from stop motion to animation movies

The lab works with **Museo Nazionale del Cinema** and participates actively during **Sottodiciotto Film Festival & Campus**.

The various activities are offered to kids and students of any age, and differ according to their age range.

Spaces and technologies of Scuola centro Civico are available for associations and entities to realize activities in the public interest.
