

The project

“Social Integration through Urban Growth Strategies”- “SINERGI” was funded with the support of the European Union under the Programme "Europe for Citizens"

Applicable to the Action 1, Measure 1.2 " Networks of twinned towns"

Participation: The project SINERGI involved notably representatives from the local authorities and local administration, citizens associations and civic organizations representatives, researchers, academics, experts and students from the cities of **Skopje (Macedonia), Turin (Italy), Zagreb (Croatia) and Lisbon (Portugal)**.

Location/ Dates: The project activities took place in the cities of: **Turin (Italy)** from **24/03/2014** to **26/03/2014**; **Zagreb (Croatia)** from **15/07/2014** to **17/07/2014**; **Skopje (Macedonia)** from **03/12/2014** to **05/12/2014**; **Lisbon (Portugal)** from **14/04/2015** to **16/04/2015**; **Turin (Italy)** from **30/06/2015** to **02/07/2015** and **Skopje (Macedonia)** from **18/11/2015** to **20/11/2015**.

Short description:

The project SINERGI was focused on establishing a network of cooperation between representatives from the city administration, experts, academia, civic organizations that work on promoting and exercising EU knowledge and experience in citizen's participation in the field of urban planning and development, with promotion of good practices from the partner cities Skopje, Turin, Zagreb and Lisbon.

The aim of the project was organization of activities that created a platform for exchange of knowledge that brought together in a creative and open debate and communication between local authorities, Universities and research community, civil organizations and civil activist and citizens. The project developed and created an open hub where experts and citizens had an opportunity to interact together with the decision makers and different stakeholders that work together on construction of new models of social inclusion in the process of urban development.

Target groups on all project events were city representatives, experts, researchers, representatives from the universities, students as well as representatives from the citizen organizations. Through the six project events, they all have an opportunity to meet their counterparts from other partner cities and universities and to discuss and debate on the management of similar situations. The project activities have reflected and debated the existing EU policies of urban development and explored the potential and benefits of development of new and innovative policies of urban management, importance of citizen participation and influence to development of sustainable economy and showcasing the impact of inclusive strategies to local issues with an European dimension.

was used as a digital tool for enhancement of the visualization of the relevant data providing a useful tool for better understanding of the complexity of the site and the process of inclusion. InViTo was successfully used as a tool for mediation between various stakeholders and interest groups.

Event 5– Second Thematic Workshop

Participation: The event involved **89 participants** from the city administration, civic organizations, academics, students and experts from the City of **Turin, Italy (67 participants)**, the City of **Zagreb, Croatia (7 participants)**, the City of **Lisbon, Portugal (8 participants)** and from the City of **Skopje, Macedonia (7 participants)**.

Location/ Dates: The event took place in **Turin, Italy** from **30/06/2015** to **02/07/2015**

Short description:

The aim of this project event was the opportunity for interaction between the decision makers, experts, students, representatives from the academia and citizens on issues related to: Novel strategies of urban growth; Innovative use of ICT in participation, negotiation and delivery of solutions; Raising awareness of decision makers on potential of EU policies on solving local urban issues; Building a sense of belonging among participants to the area of common European issues; Delivery of innovative and creative urban strategies for development. This event was organized as a creative environment for close collaboration and interaction between the local stakeholders within the process of exploration of innovative and non-standard proposals for future development of part of the city of Turin that is undergoing the transformation. Visit of the site of interest and direct insight of the local residents has been performed by the workshop participants and the students from Politecnico di Torino as a preparatory work for the workshop. The participants had an opportunity to develop innovative and context sensitive strategies through exploration of synergies between citizens' vision, infrastructure, commerce, transport, local governance and urban planning enhanced through innovative use of parametrically based interactive visualization tool- InViTo. Project quality and participation satisfaction survey have been presented at the final meeting.
